S U M M A R Y

Experienced programmer with a track record of more than 4 years in software development, specializing in creating efficient, scalable, and user-centric applications. Proficient in a range of programming languages, frameworks, and tools, I have successfully delivered projects that combine technical expertise with creative problem-solving. My ability to collaborate seamlessly with cross-functional teams, coupled with a passion for staying updated on emerging technologies, has allowed me to consistently contribute to the creation of cutting-edge solutions. With a dedication to delivering high-quality code and a proven ability to meet project objectives, I am poised to contribute my skills to drive innovation and exceed expectations.

W O R K   E X P E R I E N C E

CIMB Niaga   *Fulltime*

Backend Developer   *Jan 2025 - Present*

As an outsourced Backend Developer at CIMB Niaga, I am responsible for building and maintaining robust server-side applications and APIs to support the bank's digital services. Working closely with internal teams, including front-end developers, business analysts, and QA engineers, I ensure seamless integration and optimal performance of backend systems.
- Develop and maintain scalable backend systems using Java Springboot
- Design and implement RESTful APIs and microservices.
- Collaborate with internal teams to understand system requirements and deliver effective solutions.
- Support deployment processes and CI/CD pipelines.

In addition to my core backend responsibilities, I am actively involved in the Generative AI team, focusing on the development of an intelligent chatbot system. This includes integrating AI capabilities into the backend architecture to enable natural language interactions and automated customer support features.

Lokadata.id   *Fulltime*

Fullstack Developer   *Sept, 2023 - Dec 2024*

As a Fullstack Developer at PT Lintas Cipta Media as known as Lokadata.id Lokadata that one of Djarum Foundation Group, I am responsible for SurV App, a survey application for Android and iOS. My role includes:
- Developing a responsive, cross-platform interface using Flutter to ensure seamless experiences for users on mobile devices.
- Optimizing backend functionality and managing data processes through Laravel, providing a stable and efficient server-side infrastructure.
- Crafting dynamic front-end components with Vue.js for a smooth, user-friendly web experience. Implemented advanced state management in Vue.js components, optimizing data flow and rendering times; this initiative improved page load speeds by 30%, resulting in an enhanced user experience and lower bounce rates.

In addition to development, I manage DevOps tasks, such as deployment pipelines, continuous integration, and continuous delivery (CI/CD) workflows. This approach ensures rigorous testing, quality control, and smooth updates for users throughout the application's lifecycle.

PT Alan Mediatech Indonesia   *Fulltime*

Fullstack Developer   *Oct, 2020 - Sept 2023*

At Alan Creative my responsibility is to develop web pages, Restfull APIs, and program documentation to meet client needs and wants. Some of the projects I've worked on :
- Vogaon(Voucher Game Online) e-commerce Web
- MRT Jakarta Tunnel Area Monitoring Sistem
- Wika Realty Website
- iMarketku (e-commerce)
- Sahabat CPNS (Learning Management Sistem)
- Buddymed (Learning sistem with Meet Conference)
- HTAsialink 2022 Kemenkes (Web conference slstem)
- etc.

Apart from that, I also develop internal systems for attendance, finance, marketing, and correspondence. And I am also the team lead for the internship division for the Developer & UI/UX field. During my tenure at Alan Creative, I successfully made tangible contributions in creating effective software solutions and consistently delivering high-quality results.

Teman Pasar   *Contract*

Backend Developer   *Oct, 2020 - Jul, 2023*

Temanpasar is a startup that operates in the e-commerce sector, in this company I work part-time, because it is still in the same scope as the company PT Alan Mediatech Indonesia
- Collaborated with another team to develop the Teman Pasar application to synchronize Frontend and backend work efficient
- Develop Restfull APIs for Teman Pasar applications from scratch, using Laravel as the framework used
- Developing the database system according to the flow of the application
- Create documentation for each API endpoint that is made to be easy to maintain and use, using Postman

CV Prima Cyber Team   *Freelancer*

Programmer   *Aug, 2020 - Sept, 2020*

As a Web Developer at CV Prima Cyber Team, I was responsible for designing, developing, and maintaining visually appealing and user-friendly websites. I collaborated closely with cross functional teams to translate design concepts into functional websites that aligned with project goals and branding guidelines. Key Responsibilities :
- Collaborated with designers and content creators to implement intuitive user interfaces and ensure consistent user experiences across various devices and browsers.
- Developing a website for a client which is a school to promote the majors in the school
- Design a website according to what the client want
- Collaborate with other division teams to get content and what must be on the website
- Optimized websites for SEO, implementing techniques to improve search engine visibility and organic traffic.

During my tenure at CV Prima Cyber Team, I successfully contributed to the creation of impactful web solutions, consistently delivering high-quality results and maintaining a strong commitment to continuous learning and improvement.

PT. TRASPAC Makmur Sejahtera   *Internship*

Software Engineer   *Jan, 2019 - Jun, 2019*

My Responsibilities during internship at PT Traspac Makmur Sejahtera :
- Developing a company website from scratch together with other internship teams
- Participating in training activities at MABES TNI, by helping distribute the needed computer equipment
- Conducted thorough testing, including functionality, usability, and performance testing, and addressed issues through debugging and troubleshooting processes.
- Helping to deal with bugs that occurred in previous projects

OTHER EXPERIENCE

Superprof - Learning Platform   *Part-time*

Mentor & Private Teacher   *Mar, 2022 - Present*

As a Mentor and Private Teacher on the Superprof platform, I have successfully provided personalized learning experiences to over 40 students from diverse educational backgrounds. I specialize in delivering one-on-one and small group lessons tailored to each student's unique learning goals and pace.

Key Responsibilities:
- Design and deliver customized lesson plans based on students' academic needs and objectives.
- Conduct interactive and engaging online or in-person tutoring sessions
- Track student progress and provide regular feedback and guidance.
- Offer mentorship to help students develop study strategies and critical thinking.
- Maintain communication with students and/or parents to ensure learning effectiveness.

Achievements:
- Successfully mentored and taught over 40 students with improved academic performance.
- Helped students prepare for school exams and university entrance.
